NSERC Discovery Grants 2016 competition The Discovery Grants Program supports on-going programs of research (with long-term goals) rather than short- term goals or a collection of unrelated projects. These grants recognize the creativity and innovation that are at the heart of all research advances. Researchers are free to work in	9 years 7 months ago	<ul style="list-style-type: none">• Health and Life Sciences• Information and Comm unications Technolog y• Physical Sciences and Engin eering

What is Research Alerts?

Research Alerts is a communications technology that allows UoG faculty, staff and students to stay up to date on news from the Office of Research. Through Research Alerts, subscribers receive emails related to research funding opportunities, workshops and events, policies and more. Each subscriber sets individual preferences to indicate the topics and categories of information that are of interest to them. When a message (Alert) is published in the Office of Research that matches the subscriber's selected preference categories and topics, it is e-mailed directly to the subscriber. Because this is a web-based technology, the Research Alerts site can also be searched using the search fields, or browsed through the topics by category.
