The Horizon Prize	3 years 10 months ago
-----------------------------------	-----------------------

The Horizon Prize, powered by MIT Solve, seeks technology-based solutions that use data to help rare disease patients get the right care faster and more accurately. To that end, this Challenge seeks solutions that:

- Health and Life Sciences
- Information and Communications Technology

- Leverage big data and analytics to improve the detection and...

BioteCanada Gold Leaf Awards	3 years 10 months ago
--	-----------------------

Launched in 2001, the Gold Leaf awards are given annually to recognize both companies and individuals who have made significant contributions to the biotech industry in Canada. The Awards' importance to the recipients and the industry more broadly has grown

What is Research Alerts?

Research Alerts is a communications technology that allows UoG faculty, staff and students to stay up to date on news from the Office of Research. Through Research Alerts, subscribers

Honours and Awards

Published on Research Alerts (<https://www.uoguelph.ca/research/alerts>)

receive emails related to research funding opportunities, workshops and events, policies and more. Each subscriber sets individual preferences to indicate the topics and categories of information that are of interest to them. When a message (Alert) is published in the Office of Research that matches the subscriber's selected preference categories and topics, it is e-mailed directly to the subscriber. Because this is a web-based technology, the Research Alerts site can also be searched using the search fields, or browsed through the topics by category.
