Driven crazy by Research Alerts? How to control them You can customize your Research Alerts settings to ensure that the alerts you receive are relevant to you. If you don't wish to receive all alerts, specify the discipline relevant to your research program. You can also adjust the frequency with which you receive alerts (i.e...	*8 years 4 months* ago	• Health and Life Sciences • Humanities • Information and Communications Technology • Physical Sciences and Engineering • Social Sciences
ResearchLink's Human Ethics module to go live in the week of December 5, 2016 ResearchLink is a web-based portal that will provide a gateway for submission, review and approval of Human Ethics protocols. (Other modules, including grants and contracts submissions, animal use protocols and biosafety protocols will be introduced in 2017 and 2018.)	*8 years 5 months* ago	• Health and Life Sciences • Humanities • Information and Communications Technology • Physical Sciences and Engineering • Social Sciences

What is Research Alerts?

Research Alerts is a communications technology that allows UoG faculty, staff and students to stay up to date on news from the Office of Research. Through Research Alerts, subscribers receive emails related to research funding opportunities, workshops and events, policies and more. Each subscriber sets individual preferences to indicate the topics and categories of information that are of interest to them. When a message (Alert) is published in the Office of Research that matches the subscriber's selected preference categories and topics, it is e-mailed directly to the subscriber. Because this is a web-based technology, the Research Alerts site can also be searched using the search fields, or browsed through the topics by category.
