[New Frontiers in Research Funds \(NFRF\) – Exploration Grant 2024](#)

The goal of the Exploration stream is to inspire high-risk, high-reward and interdisciplinary research.

Exploration grants support research that pushes boundaries into exciting new areas. Researchers are encouraged to think “outside of the box” and undertake research that would defy...

Category

OVC has received a generous bequest from the Estate of Brigitte Jager to study the prevention of animal cruelty and neglect.

Some animals in human care experience less than optimal welfare, sometimes due to cruelty (e.g. bullying or sadism) or, more often, due to neglect, and overlooking...

[New e-System for REB – Status and Survey](#)

9 months 1 week ago

Research Management and Support

The Office of Research has made significant progress on the implementation of a new electronic REB submission system – workflow testing begins in June.

This system includes a dynamic online form, document management and sharing features, real-time status information and powerful workflow...

What is Research Alerts?

Research Alerts is a communications technology that allows UoG faculty, staff and students to stay up to date on news from the Office of Research. Through Research Alerts, subscribers receive emails related to research funding opportunities, workshops and events, policies and more. Each subscriber sets individual preferences to indicate the topics and categories of information that are of interest to them. When a message (Alert) is published in the Office of Research that matches the subscriber's selected preference categories and topics, it is e-mailed directly to the subscriber. Because this is a web-based technology, the Research Alerts site can also be searched using the search fields, or browsed through the topics by category.
