Date	Location	Notes
Monday December 5, 2016 8:00am to 10:00am	Fairmont Chateau Laurier, Drawing Room,1 Rideau Street, Ottawa, Ontario	RSVP by November 29, 2016 613.947.3885 or APM- APA@innovation.ca

Description

With guest speaker Andrew Pelling: Fostering creativity in the lab

Andrew Pelling has created human body parts from plants and grown living skin on LEGO. The University of Ottawa professor and entrepreneur has built his career on curiosity, creativity and serendipity. And it has made him an award-winning scientist, Canada Research Chair in Experimental Cell Mechanics and TED Fellow.

Join us to find out how Andrew Pelling's research lab brings together artists, engineers, and natural and social scientists to explore living technologies of the future.
