Description

INOVAIT is a new pan-Canadian network funded by the Government of Canada and hosted at the Sunnybrook Research Institute with the objective of strengthening Canada's leadership in the image-guided therapy (IGT) sector by supporting and encouraging collaborative development and the integration of artificial intelligence (AI) and data advances into medical technologies.

On March 8, 2021, INOVAIT will be launching the application period for its Spring 2021 round of funding. They are looking to provide short-term pilot R&D projects in AI and IGT with up to \$125,000 in matching funds. The most promising projects will then be eligible for follow-on funding of equal or greater amounts for three subsequent years. This competition is open to Canadian corporations, academic institutions, and not-for-profit organizations; however, each project requires two or more Canadian partners and must actively involve at least one Canadian small and medium enterprise (SME).

Special Notes

Please note that research activities carried out in the context of COVID-19 need to adhere to the University of Guelph COVID-19 research principles, policies, guidelines and processes as they may be updated from time to time and communicated on the [Office of Research web-page](#) [2].

Deadlines

If College-level review is required, your College will communicate its earlier internal deadlines.
