Description

The Canadian Poultry Research Council (CPRC) made changes for the 2016 call and will maintain these changes for the 2017 call. The research categories previously used were unable to accommodate some new initiatives in poultry research (i.e.: climate change, smart agriculture, precision agriculture). The CPRC Board of Directors decided that the ad hoc category that was originally designed to fill these gaps was not as effective as it has been in the past. The Board established a three-category approach for the 2016 call designed to accommodate both ongoing research issues and respond to evolving areas of research. Specific priority areas and desired research outcomes, most included in the 2012 [National Research Strategy for Canada's Poultry Sector](#) [3], have been identified within the categories. The 2017 call for LOIs encompasses the three categories and their priorities that are identified below.

Research Categories and Priorities – 2017 Call

Maximum Project Value

Applicants should limit their requests from CPRC to a maximum total of \$60,000 per investigator. Collaboration among multiple investigators working towards a common objective(s) is encouraged. Budgets exceeding \$60,000 per investigator should be discussed with the CPRC office before submitting an application for evaluation.

Industry dollars, whether from CPRC or other industry sources, must be matched with non-industry dollars at a ratio of at least 1:1. Higher leverage ratios are preferred.

Indirect Costs

25%

Special Notes

Examples of previously funded projects, grouped by the pre-2017 research categories, are available on the CPRC website (www.cp-rc.ca) at the Programs section.

[A Request for Proposals \(RFP\) from Chicken Farmers of Canada \(CFC\) is included with this Call for LOIs \[4\]. LOI submissions are to be submitted to CPRC but clearly identified as](#)

being in response to the CFC Request for Proposals. Details of the 2017 RFP, application instructions, and description of review process are available [here](#) [5].
