Description

Foundation for Science and Technology Development of Ton Duc Thang University (FOSTECT) announces funding opportunities for basic and applied research in 2018. Details are given as follows:

Goal

- The funding aims to support potential research projects and to promote scientific research activities of Ton Duc Thang University (TDTU);
- Developing research capacity of individuals and research groups;
- Promoting international cooperation in research with TDTU's partners;
- Improving quality and quantity of scientific publications, inventions and applications.

Scope of Funding

- Funding will be provided to basic and applied research in all fields.

Eligibility

Applicants are TDTU's researchers and other researchers around the world.

- Principal investigators must have good research track records in the last five years;
- Project's members have appropriate expertise and ability to proposal content.

Maximum Project Value

- The Principal investigator uses at least 75% of the total budget for research activities (based on the explanatory budget plan):
 - Guiding students, specially graduate students or doctoral students: the expenses for guiding students to complete their theses
 - Attending domestic and international conferences/seminars (including travel and accommodation expenses);
 - The expenses for purchase of supplies, chemicals, materials, tools and proposed equipment must be used directly for research activities (except Laptop or Desktop) and in accordance with current regulations on this activity;
 - Research collaboration: the cost of inviting experts to the University for collaborative research, or the cost of collaborating with other research units outside the University.
- Other expenses include the expenses for organizing seminars, symposiums, scientific conferences, purchasing documents, data and printing.
- For projects using less than 75% of the total budget for research activities in Section 4.a (using more than 25% of funds for other activities or personal income), the principal investigators must declare highly-prestigious research outputs in their proposals.
