Informational webinars will also be running [Nov. 2](#) [4] and [Nov. 12](#) [5].

Description

The Lab2Market Program is designed to help researchers validate their ideas with the purpose of finding business/commercial value. The program is based on similar programs that have found success in other parts of the world, but with a Canadian twist.

Applications are now open for the third cohort of the Lab2Market program. This **seven week online program** delivered by Dalhousie University will fund and equip faculty members and their graduate students with the entrepreneurial skills needed to assess the commercial viability of their university-based research innovations.

The program is looking for faculty researchers with big ideas who believe that their **technology-based innovations** can solve real world problems. Together with the full-time commitment of their graduate students and the support of mentors, teams will go through a program that provides the resources, training and guidance needed to take their innovations to market.

Eligibility

- Applicant must be a graduate student (MSc or PhD) or postdoctoral fellow (graduated within 5 years)
- Technology must be proven to be technically feasible (it doesn't need to be

implementable tomorrow; it just needs to be feasible e.g. don't travel faster than the speed of light)

- Technology must be the focus of the graduate student's program
- Graduate student must receive permission from his supervisor and funding agency to take 2 months to work on L2M full time (min 30 hours / week)
- Please ensure that if you have received Mitacs funding previously, you have remaining credits and DO NOT have overlapping Mitacs funding during Lab2Market

Project Duration

Seven-week online program (kick-off March 15, 2021)

Special Notes

Please note that research activities carried out in the context of COVID-19 need to adhere to the University of Guelph COVID-19 research principles, policies, guidelines and processes as they may be updated from time to time and communicated on the [Office of Research web-page](#) [6].

Deadlines

If College-level review is required, your College will communicate its earlier internal deadlines.

Type	Date
External Deadline	Friday, November 20, 2020 - 11:59pm

How to Apply

[Complete the online application form](#) [7].

For Questions, please contact

Applicants will be connected with a Mitacs rep as part of the application process.
