

Major Science Initiatives Fund - 2023

Sponsor

Canada Foundation for Innovation

Description

The Major Science Initiatives Fund provides support for the ongoing operating and maintenance needs of research facilities of national importance and ensures that they use appropriate management and governance policies and practices. This competition will provide multi-year funding toward the Operation & Maintenance (O&M) needs of facilities for the period April 1, 2023 to March 31, 2029.

Through this competition, the CFI will continue to contribute to O&M needs of facilities of national importance for which the loss or absence of support would represent a serious setback for Canada. This includes facilities which may not have been previously funded through the program, provided these are successful in meeting the eligibility and assessment criteria established for this competition. Funding provided by the CFI will complement existing O&M resources to address the operational needs of the successful facilities. It is expected that current O&M funding partners will continue their support. More information about this program can be found at the [CFI website](#) [1].

Funding Availability

The CFI will invest up to \$660 million through the 2023 competition.

Special Notes

Please note that research activities carried out in the context of COVID-19 need to adhere to the University of Guelph COVID-19 research principles, policies, guidelines and processes as they may be updated from time to time and communicated on the [Office of Research web-page](#) [2].

Deadlines

If College-level review is required, your College will communicate its earlier internal deadlines.
