The Gerhard Herzberg Canada Gold Medal for Science and Engineering, NSERC's highest honour, recognizes research contributions characterized by both excellence and influence—two qualities that defined Dr. Herzberg's illustrious career. It is awarded annually to an individual who has demonstrated sustained excellence and influence in research for a body of work conducted in Canada that has substantially advanced the fields of natural sciences or engineering.

Eligibility

The nominators must be Canadian citizens or permanent residents of Canada. Posthumous or self-nominations will not be accepted.

The nominee must be a scientist or engineer employed at a Canadian university, Canadian federal or provincial government lab or private firm active in Canada whose research is primarily based in the fields of the natural sciences and/or engineering.

Prize

In addition to the medal, the winner is awarded a grant of up to \$1 million to use for personal university-based research or to direct in some related way, such as the establishment of scholarships or research Chairs in his or her name at Canadian universities. The monetary award is distributed over a five-year period. Research grant funds paid to winners of this prize are subject to the [Tri-Agency Financial Administration Guide](#) [1].

Special Notes

Please note that research activities carried out in the context of COVID-19 need to adhere to the University of Guelph COVID-19 research principles, policies, guidelines and processes as they may be updated from time to time and communicated on the [Office of Research web-page](#)
