Program

Infectious Diseases and Climate Change Fund (IDCCF)

For More Information

[More Information about this Fund](#)

[How to Get Started](#) [1]

Description

The Infectious Diseases and Climate Change Fund (IDCCF) addresses the impact of climate change on human health in Canada by:

- increasing capacity to respond to the rising demands posed by climate-driven zoonotic (diseases that can be transmitted from animals and insects to humans), food-borne and water-borne infectious diseases
- ensuring Canadians and communities have access to timely and accurate information to better understand their risks and take measures to prevent infection
- improving adaptability and/or resiliency to the health impacts of climate-driven infectious diseases, through surveillance and monitoring activities and access to education and awareness tools, to enable:
 - Health professionals the information they need to support accurate guidance and advice to their patients and clients on climate-driven infectious diseases
 - Canadians and communities the tools to protect themselves from the health risks associated with climate-driven food-borne, water-borne and zoonotic infectious diseases

Priority Areas

1. Monitoring and Surveillance: Building baseline data to predict and respond to climate-

driven infectious diseases better, by monitoring and analyzing the movement of infectious diseases, particularly in underserved communities.

2.

Education and Awareness: Promoting the development, uptake and/or distribution of education and awareness materials for use by health professionals. Facilitating education, awareness and/or the dissemination of tools and best practices across Canadian communities and/or among vulnerable populations.

Eligibility

You may be considered for funding if you fall under one or more of these categories:

- Canadian not-for-profit voluntary organizations and corporations
- Unincorporated groups, societies and coalitions
- Provincial, territorial, regional and municipal governments and agencies
- Indigenous organizations
- Organizations and institutions supported by provincial and territorial governments (regional health authorities, schools, post-secondary institutions, etc.)
- Applicants deemed capable of conducting activities that meet the scope, objectives and priorities of the IDCCF

Funding Availability

Funds will be paid through a combination of single-year and/or multi-year funding agreements.

Deadlines

If College-level review is required, your College will communicate its earlier internal deadlines.

Type	Date	Notes
Internal Deadline	Friday, September 22, 2017 - 4:30pm	Researchers are required to submit a signed OR5 form along with the complete Funding Application to Research.Services@uoguelph.ca [2].
External Deadline	Friday, September 29, 2017 - 11:59pm	Researchers will submit the approved Funding Application directly to PHAC.

How to Apply

Please contact PHAC by e-mail at CGCOperationsCSC@phac-aspc.gc.ca for

- information on how to apply
- more information about the fund
- to obtain a Funding Application

PHAC will acknowledge receipt of your funding request within 10 business days.
