- · Evaluation criteria

### **Description**

The Northern Scientific Training Program (NSTP) is administered by Polar Knowledge Canada (POLAR). It was established in 1961 to encourage Canadian universities to participate in training northern specialists to meet national needs. Today, it is the Northern Scientific Training Program (NSTP) and provides supplementary funding to over 300 students annually at over 35 universities across Canada. The program is administered by POLAR as part of its mandate to foster science and technology in Canada's North. The objective of the NSTP is to increase the number of students who have specialized in some aspect of northern studies and who have northern research experience. This objective is attained by encouraging the formation of multidisciplinary focal points for northern studies within Canadian universities and Northern postsecondaries (i.e. Northern Studies Committees) and by providing supplementary financial assistance for eligible students to offset the high cost of northern research (i.e. transportation costs, living costs, shipping costs and interpreter fees). Universities receiving Northern Scientific Training Program support are encouraged to develop a special focus for training in northern studies, to orient students towards northern studies and northern careers, and to foster an exchange of information among scholars of various disciplines with an interest in the Canadian North.

# **Eligibility**

#### Eligible applicants

 Be enrolled in a degree program at a Canadian university or Northern post-secondary institution

Published on Research Alerts (https://www.uoguelph.ca/research/alerts)

- Students must be Canadian citizens or permanent residents.
- Winter projects are eligible December 1 to March 31 the following year
- Post-doctoral researchers and research assistants (with the exception of Northern postsecondary students) are not supported.

Students are also encouraged to apply for NSTP funds for the purpose of dissemination or reporting back to the community

#### Supported fields of research

The program funds projects on northern topics from all disciplines and in multi-disciplinary fields.

#### **Geographical focus**

The NSTP supports projects that lie north of the southern limit of the discontinuous permafrost zone, with the addition of all of the Southern Yukon in the West; that section of Labrador south to and including Red Bay; and the other seven Arctic countries (Finland, Greenland (Denmark), Iceland, Norway, Russia, Sweden and the U.S.A. - Alaska).

**Note for 2022:** Due to the sanctions imposed in response to the gravity of Russia's violation of the sovereignty and territorial integrity of Ukraine, and grave human rights violations that have been committed in Russia, POLAR will be unable to fund projects taking place in Russia or involving collaborations with Russian organizations for the 2023-2024 fiscal year.

#### **Use of Northern Scientific Training Program funds**

The program's funds are restricted. They are a supplement meant to offset the additional costs of northern research (e.g. transportation and living costs). The NSTP is not intended to be a source of primary support for students pursuing northern research.

# **Maximum Project Value**

The average NSTP allocation is up to \$6,000 per student.

NSTP will provide one year of funding for thesis-based research at the undergraduate level, up to two years of funding for thesis-based research at the Master's level and up to three years of funding for thesis-based research at the Doctoral level. Students may apply and be granted funding in any year of their programs.

#### **Indirect Costs**

0%

# **Project Duration**

The program is based on winter projects falling between December 1st and March 31st of the following year. The field component is typically one - three months.

#### **END OF TEMPORARY MEASURES**

The NSTP has ended the temporary measures that were put in place due to Covid-19. As a result, students who received funding between 2020 and 2022 will have until March 31<sup>st</sup>, 2023 to use the funds; extensions will no longer be granted. Students planning fieldwork between April 1<sup>st</sup>, 2023 and March 31<sup>st</sup>, 2024, are required to submit a new application.

Students who received funding for the 2022-2023 fiscal year and who plan to do their fieldwork between November 10<sup>th</sup>, 2023 and March 31<sup>st</sup>, 2023 should submit a preliminary report.

# **Special Notes**

#### **END OF TEMPORARY MEASURES**

The NSTP has ended the temporary measures that were put in place due to Covid-19. As a result, students who received funding between 2020 and 2022 will have until March 31<sup>st</sup>, 2023 to use the funds; extensions will no longer be granted. Students planning fieldwork between April 1<sup>st</sup>, 2023 and March 31<sup>st</sup>, 2024, are required to submit a new application.

Students who received funding for the 2022-2023 fiscal year and who plan to do their fieldwork between November 10<sup>th</sup>, 2023 and March 31<sup>st</sup>, 2023 should submit a preliminary report.

#### **Deadlines**

If College-level review is required, your College will communicate its earlier internal deadlines.

Type Date Notes

Internal Deadline Thursday, November 3, 2022 - 4:30pm

Students are required to complete an application and, upon completion of their research, a research report, using the web-based forms available at Online Forms [1]. Once the online forms have been completed, they are to be submitted to the universities' Northern Studies Committee via the online system. An incomplete application may result in a rejection of funding

# END OF TEMPORARY MEASURES

The NSTP has ended the temporary measures that were put in place due to Covid-19.
