

Update on NSERC's New Research Partnerships Program

Sponsor

Natural Sciences and Engineering Research Council of Canada (NSERC).

For More Information

[NSERC's Latest News](#) [1]

Description

NSERC has finalized the design of the new partnership program grants, incorporating many of the suggestions received from consultations and individual feedback into the new program design. NSERC confirms that the new program builds on the strengths of their current partnership grants while offering greater flexibility and a broader set of partnerships.

The method of delivery for the program is still under development at this time. As a result, NSERC will continue to accept applications for **Engage**, **Engage Plus**, and **Collaborative Research and Development** (CRD) grants. Once the date for final submission to these grants is determined, NSERC will provide the research community with advance notice, allowing you to apply during the transition.

NSERC encourages all research community members to refer to the [frequently asked questions](#) [2] for additional insight.
