[Research and Grants Program](#) [1]

Description

WSIB is committed to providing exceptional programs and services to the people and businesses of Ontario.

The objective of the WSIB Grants Program is to enhance workers' compensation system outcomes by supporting innovative proposals that are aligned to our strategic mandate.

The program accomplishes this through highly practical research and training studies delivered by professionals and organizations that can strengthen Ontario's workers' compensation system now and in the future.

The 2022 WSIB Research and Grants Program will focus on research that can help make Ontario the safest place to work. Three considerations for the competition include:

1. how we work
2. how we approach health and safety
3. how we support return-to-work and recovery

The [grants agenda](#) [2] provides more information on the topics of interest for the 2022 proposal.

Eligibility

Grant proposals fall into two major categories: research grants and training grants. Both proposal types must be highly practical, delivered by leading experts and demonstrate significant potential to improve outcomes for people working in Ontario, employers or the broader compensation system.

See [eligibility criteria](#) [3] to determine who can apply to the WSIB Research and Grants

Program.

Funding Availability

The maximum funding request is up to \$150,000/year for a total maximum budget of \$300,000. The WSIB does not renew grants for the same grant purpose.

Indirect Costs

0%

Project Duration

The maximum grant length is two years (24 months).

Special Notes

Please note that research activities carried out in the context of COVID-19 need to adhere to the University of Guelph COVID-19 research principles, policies, guidelines and processes as they may be updated from time to time and communicated on the [Office of Research web-page](#) [4].
