Do you provide fair and unbiased reviews? Unconscious bias affects our judgment without us realizing it—and this can influence the review of a grant. Due to unconscious bias, peer reviewers may rate an application differently based on the gender, age, language, culture or even the affiliated institution of an applicant. To help identify...	8 years 5 months ago	Research Management and Support	<ul style="list-style-type: none">• Health and Life Sciences

What is Research Alerts?

Research Alerts is a communications technology that allows UoG faculty, staff and students to

All Alerts

Published on Research Alerts (<https://www.uoguelph.ca/research/alerts>)

stay up to date on news from the Office of Research. Through Research Alerts, subscribers receive emails related to research funding opportunities, workshops and events, policies and more. Each subscriber sets individual preferences to indicate the topics and categories of information that are of interest to them. When a message (Alert) is published in the Office of Research that matches the subscriber's selected preference categories and topics, it is e-mailed directly to the subscriber. Because this is a web-based technology, the Research Alerts site can also be searched using the search fields, or browsed through the topics by category.
